

FLAMTASTIQUE XS

Super-sleek oil lamp

You're probably familiar with those traditional oil lamps. A glass tube to shield the flame, a foot that serves as an oil reservoir and a lug to carry it all. Fatboy has transformed this golden oldie into a super-sleek new version, complete with its own quirky lug with extra functionality. Turn it and it winds up a new length of wick. For that extra bit of atmosphere when sharing a drink, or enjoying a meal, or just staring into the flames. A strong oil lamp that's more than a match for the tall campfire stories it will undoubtedly fire up.

Light up your life

Flamtastique XS is fueled by lamp oil. Thanks to the transparent section of its foot you can always see exactly how much oil is left. And its matte silicone coating makes this glass oil lamp extra strong. Flamtastique XS will feel right at home on your table all year round, and she likes to get out during the summer months too. Just don't forget to take her back inside at night! So if you're looking for an illuminating gift idea, Fatboy has a Flamtastique one...
